

SWEET

Join us for a **SWEET Project Symposium at ECO2024.** The Symposium will take place on **Monday 13 May 2024 from 17.00-18.30 in Sala Perla**

SWEET, a European Commission Horizon 2020 funded project, has been supported by a consortium of 29 pan-European research, consumer and industry partners, who have reviewed and developed evidence on long term benefits and potential risks involved in switching over to alternate sweeteners and sweetness enhancers (S&SEs) from sugar in the context of public health and safety, obesity, and sustainability.

The five year multidisciplinary project has engaged stakeholders from across the food chain - consumers, patients, health professionals, scientists, policy makers, and regulators - to address the role of sweeteners in weight control, and potentially move viable products to market. Stakeholders, including consumers, patients, health professionals, scientists, policy makers, and regulators have engaged in the project.

Visit the website to review helpful information from the Final SWEET Stakeholder Event, including key findings from the project.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 774293.
